Professional Summary
DevOps Architect with 6+ years of experience delivering cloud infrastructure, automated CI/CD pipelines, and Kubernetes container management. Expert in AWS, Docker, Terraform, and Linux administration.

Technical Skills
? Cloud Platforms: AWS, Azure, Google Cloud
? Containers & Orchestration: Kubernetes, Docker, Helm
? Infrastructure as Code: Terraform, Ansible
? CI/CD & Automation: GitHub Actions, Jenkins, CI/CD, Bash scripting
? Languages & OS: Python, Go, Linux, Shell

Work Experience
Senior DevOps Engineer | CloudScale Systems
2021 - Present (3 years)
? Designed and provisioned multi-region AWS cloud infrastructure using Terraform modules.
? Managed production Kubernetes clusters (EKS) hosting 80+ microservices with zero downtime.
? Built end-to-end CI/CD release pipelines with GitHub Actions and Docker image verification.

Cloud Infrastructure Engineer | DataOps Inc.
2018 - 2021 (3 years)
? Automated deployment workflows on AWS with Docker containers and Bash automation.
? Administered Linux Ubuntu and Debian production servers, configuring firewalls and Nginx.

Education
Bachelor of Science in Information Technology
University of Texas at Austin (2014 - 2018)

Certifications
CKA (Certified Kubernetes Administrator)
AWS Certified Solutions Architect Professional
